Title : Online Request from Ellen Allen
Record Number : 15/382
awClientNotes : Integrative Medicine is the combination of best practice in mainstream and complementary health to provide the best service by prevention first cooperation and reduced duplication of services. This is the way forward for a sustainable affordable and healthy system. I would like to this topic and complementary health practitioners on the agenda. Congratulations for opening the discussion, but deeply disappointed at the health system Tas ignoring the contribution of dedicated complementary practitioners making a huge difference. See AIMA and NIIMs for info about the progress of Integrative Medicine and its benefits.

Title : Online Request from mrs mary purins & mr w purins
Record Number : 15/705
awClientNotes : Mersey community hospital is vital to the fast growing communities of Latrobe/Port Sorell, Devonport, Ulverstone & surrounding areas. The local communities are passionate about retaining our hospital and continuing the quality of services that they deliver. Burnie Hosp.plays an important role in the far north-west but under pressure would not be able to cope without Mersey Hosp. and many locals have had stressful long trips back and forth, which is not a healthy outcome. The only alternative is building a bigger hospital in Ulverstone which would solve this ongoing saga.
